---	----------------------

## SOFTWARE PROJECTS IN ADDVIC TECHNOLOGY

### Doctor appointment management system

Developed using Spring Tool Suite, MySQL, Postman, our Doctor Appointment Management System simplifies the process of scheduling and managing appointments with healthcare professionals. Users can conveniently book, reschedule, or cancel appointments online, reducing administrative overhead and improving patient experience. With features such as real-time availability updates, automated reminders, and secure patient data management, our system enhances efficiency and ensures seamless coordination between patients and healthcare providers.

## STRENGTH

- Determination to **Achieve** the **Desired Goal** and willingness to **Work Hard**.
- Positive Attitude**, Capability to **Rational** and **Learn** from **Past Mistakes**.

## HOBBIES

- Watching Anime
- Reading books
- Drawing
- Designing UI
